

## Ferro aluminum

### ● Description of ferro aluminum

Ferro aluminum is a compound deoxidizer. It is used for deoxidizing alloying of low carbon aluminum killed steel, to get good effect of deoxidization. It is especially suitable for deoxidizing requirement of continuous casting steel.

### ● Advantages of ferro aluminum

1. To make the finished steel composition (especially carbon) easy to control.
2. The deoxidation alloying process is simplified, reduce the time of feeding aluminum wire and blowing argon, greatly lower the cost, guaranteed the high speed and stable requirement of continuous casting production.
3. Reduce the phenomenon of blocking and changing flow, improved the age of middle bag, to ensure the smooth continuous casting steel.
4. It not only meets the requirement of deoxidization in steelmaking, but also has the advantages of desulphurization, strong penetration.
5. Improve the quality of steel, reduce the cost and save the use of aluminum.

### ● Advantages of our company

1. Professional manufacturer.
2. Several decades of rich experiences in metallurgical field.
3. Strict quality control and inspection.

JIANGYIN YURUI METALLURGICAL MATERIAL CO., LTD.

● **The specifications of ferro aluminum**

Type	Composition %	Specifications
Ferro Al	A140	Customized
	A160	

● **Other notes of ferro aluminum**

**Packing:** Wrapped with water-proof woven bag.

**Storage:** Aluminum products should be stored in dry area of indoor.

**Terms of payment:** FOB shanghai port, by t/t or L/C at sight.
