

JIANGYIN YURUI METALLURGICAL MATERIAL CO., LTD.

Ferro manganese nitride cored wire

● Description of ferro manganese nitride cored wire

Ferro manganese nitride cored wire is an indispensable alloying agent for producing special alloy steel, stainless steel and heat-resistant steel. It is usually obtained by filling nitrogen with medium and low carbon ferro manganese.

● Advantages of ferro manganese nitride cored wire

1. High content of main elements, low content of harmful impurities such as phosphorus, the nitrogen utilization rate is high and the addition amount is small.
2. Improve the strength and plasticity of steel, expand austenite zone, refine grain, and improve its processing performance.
3. It can replace some nickel to reduce costs.

● Advantages of our company

1. Professional manufacturer.
2. Several decades of rich experiences in metallurgical field.
3. Strict quality control and inspection.

JIANGYIN YURUI METALLURGICAL MATERIAL CO., LTD.

The specifications ferro manganese nitride cored wire

| Type | Composition % | Diameter mm | Steel strip thickness mm | Powder weight g/m | Coil outer dia. mm | Coil inner dia. mm | Coil height mm | Wire length m |
|-------|---------------|-------------|--------------------------|-------------------|--------------------|--------------------|----------------|---------------|
| FeNMn | N4Mn73-75 | 13±0.5 | 0.4-0.45 | 450-500 | 1100 | 600 | 1100 | 4500-5000 |

Above mixtures and specifications can be supplied by customers' requirements.

Other notes of ferro manganese nitride cored wire

- Packing:**
1. Fixed with steel strip.
 2. Wrapped with water-proof film.
 3. Put into the steel cage with pallet.

Storage: Cored wire should be stored in dry area of indoor.

Terms of payment: FOB shanghai port, by t/t or L/C at sight.
