

## Solid pure calcium cored wire

### ● Description of solid pure calcium cored wire

Solid pure cored wire is made of the steel strip to encase the calcium wire. It has uniform diameter, high tensile strength, good toughness and not easy to break, more conducive to accurate control of feeding amount.

### ● Advantages of solid pure calcium cored wire

1. Reduce the cost obviously, the feed weight of per ton solid pure calcium cored wire is only about 38% of that of the silicon calcium cored wire.
2. To minimize the contamination of calcium oxide impurities, more conducive to pure steel production.
3. To reduce and eliminate the plug of nozzle clogging of cast steel.
4. It will not be introduced other oxide that of existing in powder cored wire to pollute molten steel, more conducive to pure steel production.
5. With high density mandrel, readily inspect the quality, smaller surface area, so it has a long storage period and can ensure the use effect.

### ● Advantages of our company

1. Professional manufacturer.
2. Several decades of rich experiences in metallurgical field.
3. Strict quality control and inspection.

JIANGYIN YURUI METALLURGICAL MATERIAL CO., LTD.

### The specifications of solid pure calcium cored wire

Type	Composition %	Diameter mm	Steel strip thickness mm	Core weight g/m	Coil outer dia. mm	Coil inner dia. mm	Coil height mm	Wire length m
Ca	Ca97	13±0.5	0.5	61	1100	600	1100	4500-5000

Above mixtures and specifications can be supplied by customers' requirements.

### Other notes of solid pure calcium cored wire

**Packing:** 1. Fixed with steel strip.  
2. Wrapped with water-proof film.  
3. Put into the steel cage with pallet.

**Storage:** Cored wire should be stored in dry area of indoor.

**Terms of payment:** FOB shanghai port, by t/t or L/C at sight.
